

Registering as a new Independent (private) patient?

All our new patients require a comprehensive Oral Health Screening, x-rays and confidential medical questionnaire. Dental charting along with a detailed gum examination and oral cancer screening are also carried out. This appointment is designed to gain as much information as possible and to establish what the patient requires and also what they would like to achieve. Both the dentist and patient will decide together on the most appropriate treatment to achieve a healthy and natural smile.

Initial Consultation

You can expect your first visit to the practice to take approximately 30 minutes. The fee will be £65.00 including X-rays. At the end of the consultation appointment, you will know what treatment is required to achieve optimum dental health and what cosmetic procedures, if any, are recommended. An appointment will be arranged to start treatment if you decide to proceed with the agreed treatment plan.

Recalls will be determined specifically for each patient and tailored to meet his or her needs, according to NICE guidelines based on a patient's risk of or from dental disease

Maintaining your dental health with our cost-effective practice plans

After your initial consultation you may find it more cost effective and beneficial to join one of our practice plans, our plans ensure you are seen on a regular basis, the small monthly payments effectively spread the costs of oral health care and cover the cost of your full oral health screening, examination, x-rays and hygiene (scaling and stain removals.) twice a year. They also give you initial benefits like 10% discount on most of our private treatments, regular updates about any offers on at the practice, and world-wide cover for emergency dental care.

We have a variety of different plans at the practice to suit the needs of our patients such as our regular maintenance plan as outlined above, our Perio plan for our patients who require more frequent visits with our hygienist to maintain gum health and our implant hygiene plan designed especially for our patients who have dental implants and require specific hygiene treatment.

Please contact reception for further information on any of the above.
